WORK EXPERIENCE

Galxe

May 2023 - June 2026

Senior Support Advisor (Oct 2024 - June 2026)

- Resolved 67,000+ customer support cases while maintaining a 71.4% CSAT, providing timely, professional, and accurate assistance across customer touchpoints.
- Mentored and supported customer service specialists by sharing best practices, assisting with complex escalations, and promoting consistent service standards.
- Handled escalated customer complaints and complex service issues, investigating root causes and coordinating with Product and Engineering teams to achieve timely resolutions.
- Onboarded 100+ dashboard clients, providing product guidance, coordinating campaign launches, and supporting successful customer adoption.
- Used Scorebuddy and Intercom to review service quality, identify performance gaps, and support continuous improvement in customer service delivery.
- Maintained an average First Response Time of 9m 42s and Subsequent Response Time of 1m 54s, ensuring customers received timely assistance.
- Investigated and documented 1,230 customer-reported product issues, contributing to a 71% resolution rate through collaboration with Product and Engineering.
- Analyzed customer issues and recurring complaints to identify service and product improvement opportunities and communicate findings to relevant teams.
- Created and maintained support documentation, FAQs, and troubleshooting resources to improve service consistency and enable specialists to resolve customer issues effectively.

Support Specialist (Dec 2023 - Oct 2024)

- Delivered professional customer and technical support to community users and dashboard clients through live chat and email, resolving account, campaign, and platform-related issues.
- Managed customer escalations and complex cases, coordinating with Product and Engineering teams to investigate issues and deliver appropriate resolutions.
- Built strong customer relationships by providing clear, accurate guidance and following up on issues requiring further investigation or cross-functional support.
- Used Intercom, HubSpot, and Notion to document customer cases, track issues, maintain accurate records, and support effective coordination across teams.

Work Experience continued

- Monitored recurring customer issues and feedback, documenting trends and product problems to help relevant teams identify improvement opportunities.
- Created and maintained internal support documentation, FAQs, and troubleshooting guides to improve knowledge sharing and ensure consistent customer service.
- Supported continuous improvement of customer service processes by sharing recurring customer concerns, service gaps, and practical recommendations with relevant stakeholders.

Contributor (May 2023 - Dec 2023)

- Delivered customer support by sending 8,000+ support messages and resolving 300+ Discord support tickets, assisting users with platform navigation, campaign participation, and account-related issues.
- Created 42 posts on X (formerly Twitter) and 6 educational YouTube videos promoting Galxe products and helping users understand platform features.
- Managed community engagement by hosting quizzes, games, and interactive activities that encouraged participation and fostered a positive user experience.
- Built and maintained an active community by responding promptly to user inquiries and facilitating discussions across Discord support channels.

Federal University of Technology, Minna
Bachelor of Civil Engineering (2016 - 2023)

CERTIFICATIONS

- Introduction to CRM with HubSpot — Coursera (2026)
- Sales and CRM Overview — Salesforce (2026)

PROJECTS

Intercom Ticket Snooze Automation

Tools & Technologies: PowerShell, Intercom REST API, JSON

- Developed a PowerShell automation script to automatically snooze Intercom conversations based on predefined conditions.
- Reduced manual ticket management and improved support workflow efficiency through automation.

Linux System Information Script

Tools & Technologies: Bash, Linux

- Created a Bash script that collects system information, including CPU, memory, disk usage, network configuration, and running services.
- Designed to help support engineers gather troubleshooting information quickly.
